HTML

CSS

Java Script

Our Project

on a quiz website

- ◆ The website aims to create quizzes that are interactive and interesting for users.
- ◆ Quizzes will be carefully crafted to align with educational standards and cover a comprehensive range of topics
- ◆ Quiz difficulty can be categorized into easy, medium, and hard levels. Easy level quizzes have simpler questions and are suitable for beginners or those with basic knowledge of the topic. Medium level quizzes have moderately challenging questions that require a higher level of understanding. Hard level quizzes have more complex and difficult questions that test advanced knowledge.

Multiple-choice quizzes are a popular type of quiz in which the quiz taker is presented with a question and a set of options to choose from. The quiz taker selects the correct answer from the given options.

Each quiz question has a specific time limit, ensuring that users answer questions within the allocated time.

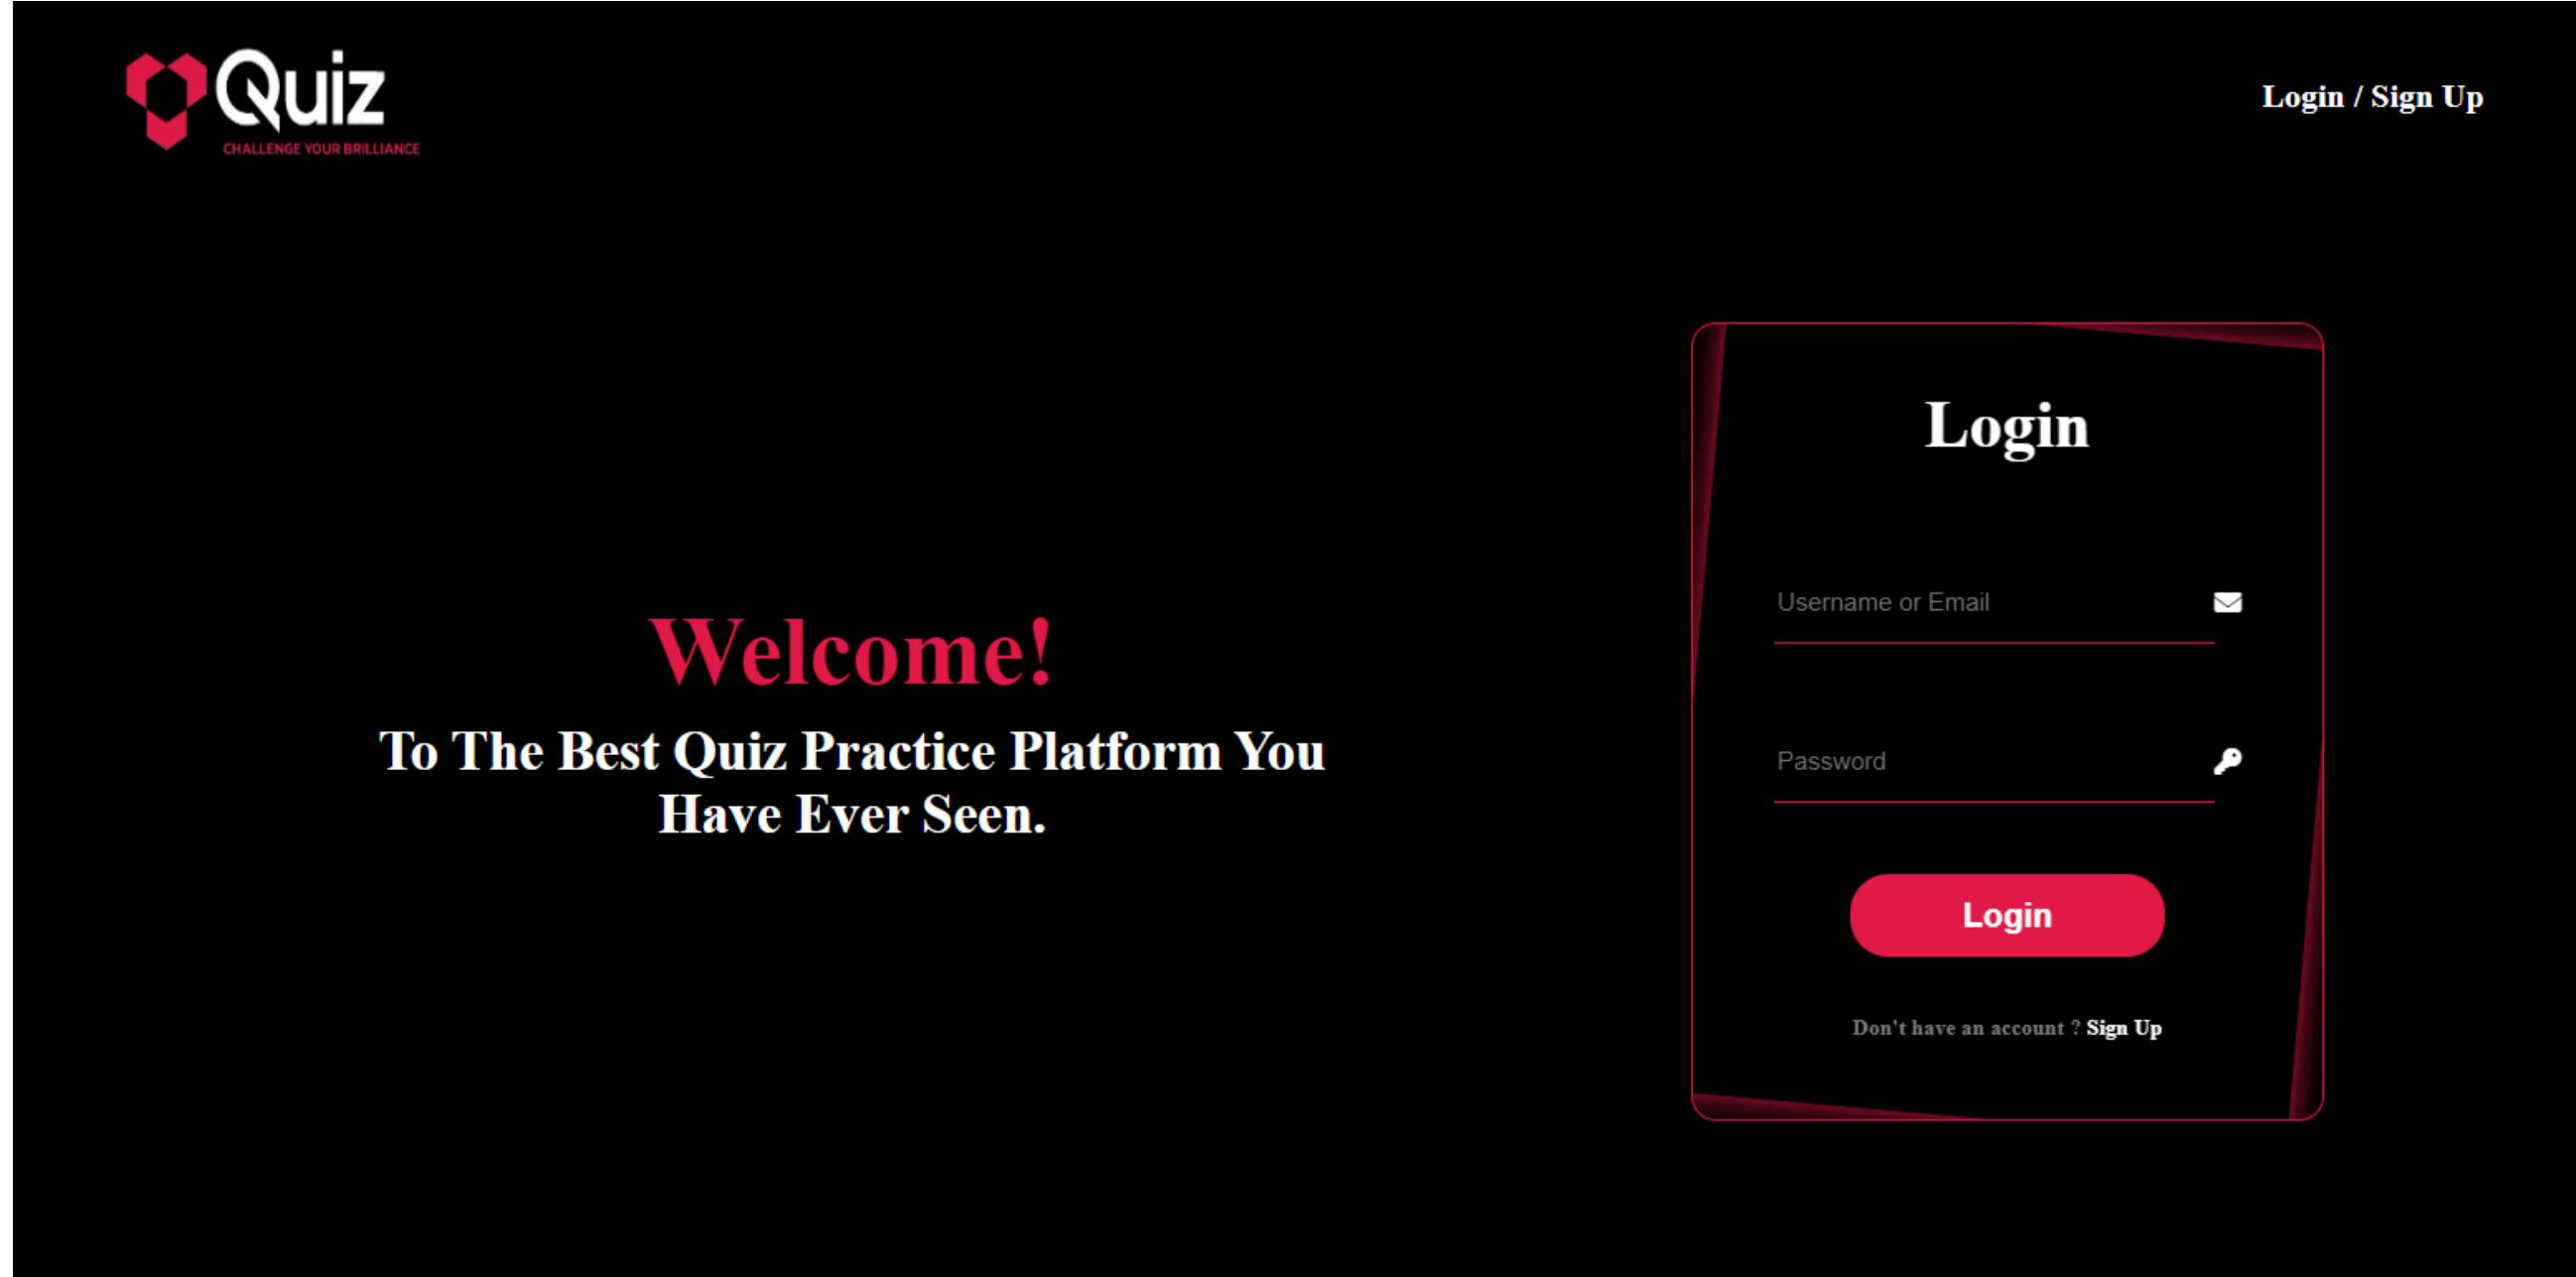

You will get immediate result after submitting your quiz section.

It displays a summary of the quiz results to the users after completing the quiz.

The summary includes the total number of questions, correct answers, and the score achieved.
